

Miller Environmental Education Fund Press Release:

### **GRANT FUNDING AVAILABLE THROUGH MEEF**

The Miller Environmental Education Fund (MEEF) is now accepting applications for grant funding for 2012. These grants are meant to support interested applicants who will have direct contact with Moultonborough children through environmental projects and learning experiences. Projects that qualify may include: construction of nature trails, wild life monitoring, water quality monitoring or climate change awareness, outdoor classroom activities and supplies, funds can be used to support operations for projects of this type (transportation, supplies, etc.) Projects previously funded by MEEF have included: Project Home Butterfly Garden, Outdoor Classroom Natural Garden, Moultonborough Academy Outing Club, and 5th Grade Growing Space.

MEEF was developed in 2007 out of a profound appreciation for the service and dedication of Michele Miller, former Principal of Moultonborough Central School and the 2006 NH Environmental Educator of the Year award recipient.

Because this fund was so recently established, grants this year will be available in amounts up to \$2400.

If you have any questions or would like to receive an application call Frances Strayer, Project Manager, at 476-5535, or e-mail [fstrayer@sau45.org](mailto:fstrayer@sau45.org). Electronic applications must be received on or before March 20, 2012.

MEEF welcomes and encourages your continued support. Please contact Frances Strayer if you are interested in making a donation to the fund.
